BUSINESS INSIGHTS REPORT

1.PROJECT OVERVIEW

- The objective of this project is to analyze Blinkit's grocery sales data using Microsoft Power BI. The dashboard provides insights into sales performance, outlet operations, customer satisfaction, and product trends. These insights help management make data-driven decisions and improve business performance.

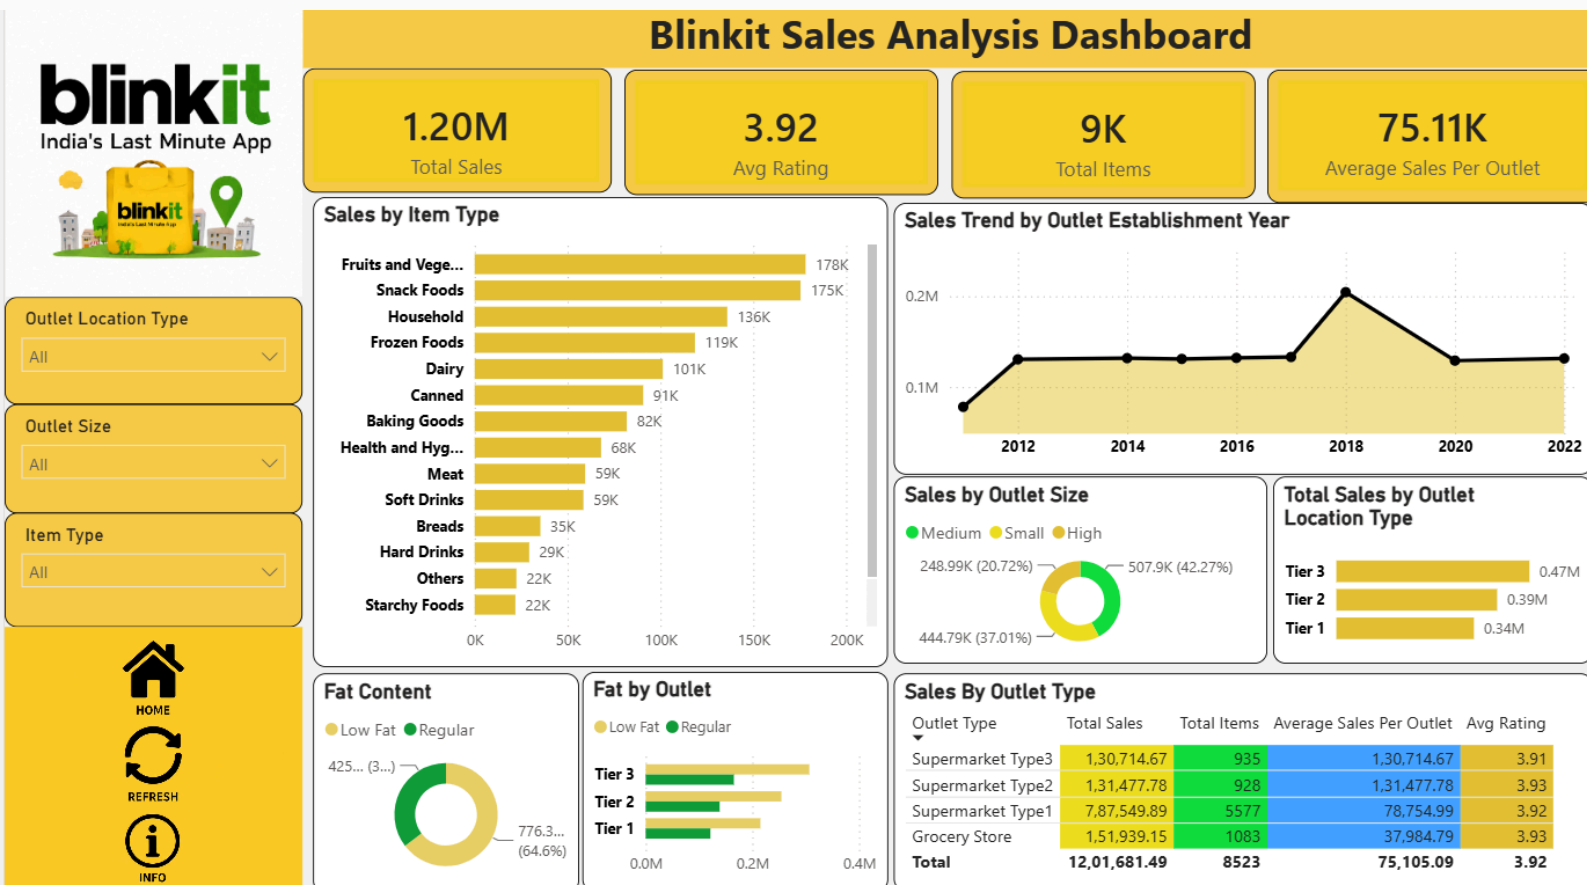

2.KEY BUSINESS INSIGHTS

- Total Sales: 1.20M with 9K items.
- Top Categories: Fruits & Vegetables and Snack Foods.
- Best Performance: Tier 3 and Medium-sized outlets.
- Fat Content: Regular Fat products generate higher sales.
- Customer Rating: Average rating is 3.92/5.

3.BUSINESS RECOMMENDATIONS

- Increase inventory for top-selling product categories to meet customer demand.
- Promote low-performing products through discounts and marketing campaigns.
- Improve customer satisfaction by maintaining product quality and service.

4.DASHBOARD OVERVIEW

5.CONCLUSION

- The Blinkit Sales Analysis Dashboard provides clear insights into sales performance, outlet efficiency, and customer satisfaction. These insights support data-driven decision-making and help identify opportunities to improve sales, optimize operations, and achieve sustainable business growth.
